Enhanced Productivity Mode

Build a high-growth, profitable business by capturing a share of the growing need for short-run jobs, delivered in fast turnaround time and enhanced with high-value features, including brand protection and mass customization, all while saving time and waste.

THE FUTURE UNFOLDS

Gain on high-growth business with the step-function press for short-run folding cartons.

The future unfolds

There's a growing appetite for boxes that go beyond basic. Consumers are increasingly in control, judging brands by their product authenticity, sustainability, and level of engagement. This shift in buyer influence is driving brands toward greater environmental responsibility, more SKUs, personalization, and faster time-to-market. Today's jobs are just different. The playing field has been turned on its head. Small/craft brands act big and mega brands act agile. As a Folding Carton converter, you need to cater to both ends of the spectrum—from strategic mini-scale runs to boxes that comply with rapidly changing regulations. Your job basket is varied and changing. Forecasting is becoming almost impossible. You need the ability to guickly maneuver and turn on a dime, without hesitation. Boxes with digital features are in hot demand, and there's no sign of this trend cooling off any time soon.

Own the high-value market with wide application range

Adapt to changing market needs with one press that does the work of three. Expand your applications with the widest range of media and inks. 4 Offer high-accuracy embellishment features, inline with the TRESU iCoat II.5

Tap into today's trends with superior tech

Excel with confidence

Optimize production efficiency by shifting to a digital mindset

Produce dozens of jobs per day and up to 1 million B2 sheets per month, by leveraging new tools to increase print time by up to 40%.² Gain real production agility with drawers, a pallet feeder, and a proof tray on a B2 format.

- Meet very short turnaround times with a B2 format ideal for short runs saving half the converting waste and cost compared to B1.
- Easily transition from one job to the next with drawers, pallet feeder, and proof-while-you-print capabilities.
- Significantly reduce setup with fastest time-to-color enabled by the HP Indigo Spot Master automated color-matching process.
- An end-to-end approach with inline priming, fully coupled coater, and the HP PrintOS^X workflow ecosystem.

- Expand your offering with off-theshelf boards, from paperboards, through metalized and synthetics media, to high-end colored substrates.
- Add value with high-accuracy spot varnish decorations with the TRESU iCoat II,5 optimized to work inline with this press.
- Expand into digital rigid box applications with lightweight media ranging from 150 microns.
- Offer value added packages with multi-layered brand protection solutions and unique designs by HP SmartStream Mosaic and HP SmartStream Collage.

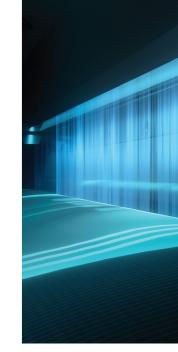

Transcend Packaging

Deliver on the highest quality to meet premium brands' requirements

Meet the most stringent brand color and quality needs in each and every job you deliver with newly introduced automated tools and the HD Imaging System.

- Achieve up to 97% PANTONE® gamut on press using CMYK, OVG, and spot colors.
- Get interchangeable offset quality with thin layers—with HP Indigo Liquid Electrophotography (LEP) Technology.
- Produce even smoother color tints, more detailed small image, and finer small/micro text with the HD Imaging System.
- Offer confidence in color performance with the automated tools and reporting system. Easily reach and maintain color to ensure that every box is the same, wherever and whenever printed.

[1] Field-proven solution based the HP Indigo 30000 Digital Press, with over 70 installations worldwide as of November, 2019. [2] Up to 40% increased print time compared to the HP Indigo 30000 Digital Press, and based on internal HP technical analysis as of November, 2019. [3] Based on HP internal analysis as of November, 2019. B2 is the optimal, more cost-effective format for short runs: die-cut and embellishment processes are 50% of setup time, and 50% of waste of B1 format in runs up to 4,000 sheets. [4] Compared to major digital printing competitors providing mid-web folding carton solutions as of November, 2019. Fastest time-to-color enabled by Spot Master technology and the inline Xrite spectrophotometer. [5] TRESU iCoat II is an optional feature, sold and serviced separately by HP.
